# Questionnaire App Documentation

**3rd April 2020**

## OVERVIEW

This application consists of four pages: Home, Questions List, Add a Question and Answers.

## INSTALLATION

After cloning the project, the following actions should be performed:

- **composer install**
- **npm install**
- **npm run dev**
- **php artisan migrate** (or **php artisan migrate --seed** if you want to also run the example seeders)

## DESCRIPTION

**Home Page** ( {baseurl}/ ): The welcome page of the project.

**Add a Question** ( {baseurl}/questions/create ): On this page you can add a new question.

**Questions List** ( {baseurl}/questions ): Here you will see a list of the existing questions.

**Answers** ( {baseur}/question/answers/create ): This is the page where you can view, answer or modify the answers of the questions. If the answer input field is blank, you can insert the answer and press the Save button. If there is an answer, you can modify it and press the Update button to save the new answer.

## TECHNICAL INFO

- Laravel Framework 7.4.0
- Bootstrap 4
- Php-CodeSniffer was used to check the code
- There are some phpunit test cases to test the models' relationships
